

# Population Ecology of `Akohekohe and Maui Parrotbill

PIERC Project Leader: Thane Pratt, Ph.D.

## Objectives

- ☆ Characterize life-histories and demography
- ☆ Determine how habitat and food availability influences populations
- ☆ Determine population recruitment, particularly losses from rats

## Accomplishments:

- ☆ 4-year field study at Hanawi Natural Area Reserve, Maui
- ☆ Results reported in 12 publications

## Significance:

- ☆ Results applicable to:
  - a) Hawai`i Forest Bird Recovery Plan
  - b) Captive breeding of these species
  - c) Reintroduction trials of these species
